

DVM O. Stiévenart,
Surgivet, Belgium

“The use of BIOCERA-VET instead of autografts shortens surgery by at least 30 min., helping me to optimize staffing, operating room-occupation and overall surgery time.”

PREOPERATIVE
X-RAY ML

Comminuted
femoral fracture
with multiple
bone fragments

POSTOPERATIVE
X-RAY AP

Lateral plate
placement and
administration of
2cc Biocera-Vet

POSTOPERATIVE
6 WEEKS
X-RAY AP

Bone healing
ongoing on fracture
site residual fracture
still observed

POSTOPERATIVE
3 MONTHS
X-RAY AP

Complete
bone healing

POSTOPERATIVE
3 MONTHS
X-RAY LM

Complete
bone healing

BIOCERA-VET accelerates fracture healing. Complete consolidation was observed 3 months after fracture reduction and implantation of BIOCERA-VET. Additionally, no adverse reaction was observed at the site of implantation.
